786,496 LACTATION RECORDS REPORTED DURING 1958

During 1958, 786,496 lactation records were reported to the Dairy Cattle Research Branch for use in proving DHIA sires. DHIA supervisors reported 712,990 of these records; 73,506 were Herd Test records reported by the various Breed Associations. The number of Herd Test records reported by the various associations is as follows:

	Herd Test records reported (number)
American Dairy Cattle Club	-- 287
Ayrshire Breeders' Association	-- 10,557
Brown Swiss Cattle Breeders Association--	5,601
American Guernsey Cattle Club	-- 31,506
American Jersey Cattle Club	-- 25,555

The number of lactation records reported each year, since 1946, is shown below:

Year	Lactation records reported (number)
1946 -----	183,884
1947 -----	250,811
1948 -----	285,083
1949 -----	391,067
1950 -----	471,721
1951 -----	540,953
1952 -----	485,949
1953 -----	501,582
1954 -----	667,074
1955 -----	636,293
1956 -----	658,086
1957 -----	565,360
1958 -----	786,496

The 786,496 records reported during 1958 represent approximately 51 percent of the 1,548,884 cows on standard test at the beginning of the year.

3, 902 DHIA SIRES PROVED IN 1958

During 1958, proved-sire records were compiled for 3, 902 sires used in dairy-herd-improvement-association herds.

The number of sires proved in 1958 by States is as follows:

<u>State</u>	<u>Sires proved ^{1/}</u> <u>(number)</u>	<u>State</u>	<u>Sires proved ^{1/}</u> <u>(nimber)</u>
Alabama	---- 22	Nebraska	---- 70
Alaska	---- 0	Nevada	---- 3
Arizona	---- 17	New Hampshire	---- 58
Arkansas	---- 8	New Jersey	---- 92
California	---- 45	New Mexico	---- 18
Colorado	---- 39	New York	---- 584
Connecticut	---- 139	North Carolina	---- 95
Delaware	---- 31	North Dakota	---- 19
Florida	---- 81	Ohio	---- 263
Georgia	---- 31	Oklahoma	---- 36
Idaho	---- 90	Oregon	---- 104
Illinois	---- 214	Pennsylvania	---- 374
Indiana	---- 178	Rhode Island	---- 27
Iowa	---- 240	South Carolina	---- 36
Kansas	---- 137	South Dakota	---- 26
Kentucky	---- 34	Tennessee	---- 31
Louisiana	---- 22	Texas	---- 72
Maine	---- 57	Utah	---- 43
Maryland	---- 197	Vermont	---- 149
Massachusetts	---- 104	Virginia	---- 159
Michigan	---- 200	Washington	---- 165
Minnesota	---- 297	West Virginia	---- 38
Mississippi	---- 30	Wisconsin	---- 319
Missouri	---- 99	Wyoming	---- 5
Montana	---- 9		
		Total -----	<u>2</u> / 3, 902

1/ Number includes 1 or more sires proved with data from some other State as well as from the State indicated.

2/ Omitting duplication.

3/ A goat sire was proved in each State, Vermont and Wisconsin.

DHIA PROVED-SIRE RECORDS TABULATED IN DECEMBER 1958

Following is a list of 319 sires whose records were tabulated or retabulated by the Animal Husbandry Research Division in December 1958. Production records used in proving DHIA sires consist of 305-day lactation records standardized to a mature equivalent twice-a-day milking basis.

An asterisk at the end of a sire's registration number indicates a retabulated record. The asterisk may be followed by any number from 1 through 15 (i. e., *12) to indicate in which of the 15 printed lists his previous record appeared. Or the asterisk may be followed by the month and year (i. e., *May 51) of the DHIA letter in which his previous record appeared. Two asterisks following the sire's registration number, or following reference to a previous listing, indicate that the proved-sire tabulation or retabulation was requested by one of the States.

In case records from more than one herd were used, the reference is to the herd from which production records for the largest number of the sire's youngest daughters were reported. If the sire has been used in an artificial-breeding association, the name of the association is given.

Proved-sire records consisting of fewer than 10 comparisons are indicated as "preliminary proofs" because these records may be significantly changed when additional comparisons become available and are included in the proved-sire records.

Proved-sire records consisting of fewer than 25 comparisons with daughters resulting from artificial breeding are indicated as "preliminary AB proofs" because these records may be significantly changed when additional comparisons become available and are included in the proved-sire records.

To make the most intelligent selection of a sire, the dairyman should use these proved-sire records to single out the most promising sire and then make every effort to supplement these data with additional information gathered from the herds in which the dams and daughters made their records. Particular attention should be given to the feeding practices and environmental conditions under which the records were made, in order to be assured that the records of the daughters were not made under more favorable conditions than those of the dams or vice versa. It is especially important to determine that there has been no selection of daughters in making the comparison.
